## Bonus compensation system for the transportation service using alternative fuels in the county of Östhammar/Sweden

---

**By incorporating a bonus compensation system in the transportation service sector increases the use of alternative fuel driven vehicles in the county of Östhammar/Sweden**

---

### Background

---

Östhammar county made a procurement of the transportation service in 2007 and the contract is valid for 3 years. The transportation vehicles using alternative fuels should be compensated by a bonus depending on the fuel used and the traveled distance.

### Major targets

---

To increase the use of environmental friendly alternative fuels

For diesel cars and mini buses the supplier holds a bonus compensation of 0.10 SEK/km for vehicles with particle filter. At most 1500/year and vehicle.

For bio- and natural gas vehicles the supplier holds a bonus compensation of 0.25 SEK/km. At most 10 000 SEK/year and vehicle.

For ethanol driven cars the supplier holds a bonus compensation of 0.20 SEK/km. At most 10 000 SEK/year and vehicle.

For electrical hybrid cars the supplier holds a bonus compensation of 0.25 SEK/km. At most 10 000 SEK/year and vehicle

### Major results and lessons learned

---

Increased use and stimulation of alternative fuels and decreased emissions of greenhouse gases in the transportation service in Östhammar county/Sweden
